How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Who is Canadian Solar?

It is a leading manufacturer of solar photovoltaic modules, provider of solar energy and battery energy storage solutions, and developer of utility-scale solar power and battery energy storage projects. Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to its customers.

Solar Group is New Zealand's leading solar provider. We have been installing solar systems since 1986 all over New Zealand and the Pacific. We do: Solar power (and batteries), Solar hot water and solar pool heating systems. Both ...

Investigate and research whether solar is right for your home/business - compare your power use with potential power solar panel output, use the SEANZ Solar Optimiser or Gen Less Solar power calculator.

Taking that into account, the solar system will produce 285,000 kWh in 25 years. The price per kWh of solar electricity is therefore  $30,000 / 285,000 = \$0.105$  (10.5 cents) The average price of a kWh in New Zealand is 21 cents. So, even in New Zealand, with the relatively cheap kWh prices, Solar is half the price.

Combining solar, storage and EV charging, Sigenergy offers an all-in-one Home Solar Energy System that
