

New Zealand sefe energy

What is New Zealand's energy strategy?

New Zealand Energy Strategy The Government is working to develop a plan that will help to guide the fossil gas sector to reduce emissions, in line with our legislated targets, emissions budgets and Aotearoa New Zealand's international commitments. Gas Transition Plan

When will the New Zealand energy strategy be published?

We will be updating this page over the course of the year. The strategy will be published by the end of 2024. The Government is developing the New Zealand Energy Strategy to support the transition to a low emissions economy, address strategic challenges in the energy sector, and signal pathways away from fossil fuels.

What is New Zealand's energy self-sufficiency?

In 2023, national self-sufficiency remained unchanged in at 73 per cent. Key contributors to New Zealand's energy self-sufficiency are coal and oil -- Self-sufficiency: The ability of a country to meet its own energy supply needs through domestic production.

What energy sources are used in New Zealand?

Electrical energy in New Zealand is mainly derived from renewable energy sources such as from hydropower, geothermal power and wind energy. The large share of renewable energy sources makes New Zealand one of the most sustainable countries in terms of energy generation.

Can New Zealand achieve net zero emissions by 2050?

Energy sourced from fossil fuels is responsible for 40% of New Zealand's greenhouse gas emissions. Increasing our use of low-emissions renewable energy will be critical to reach our country's legislated target of net zero emissions by 2050. Currently, about 6% of New Zealand's electricity is generated from wind turbines.

Who is responsible for energy use in New Zealand?

The Ministry of Business, Innovation and Employment is responsible for economic issues surrounding energy use and the Ministry for the Environment addresses the environmental cost of energy use in New Zealand. Exploration and production of fossil fuels comes under Crown Minerals, a division of the Ministry of Economic Development.

Energy in New Zealand 2024 8 Figure 3. Energy intensity by sector SELF-SUFFICIENCY REMAINED UNCHANGED New Zealand relies on a combination of domestically produced and imported fuels to meet its energy needs. A common metric used internationally to measure this is a self-sufficiency indicator, which shows how well we can meet our own energy supply

The SEFE name reflects the new role of the SEFE group in securing a reliable source of energy for Europe and driving the green energy transformation. Who owns SEFE Energy? SEFE Energy Limited is 100% owned
