

New York's latest battery storage project

Where is New York's first state-owned battery energy storage project located?

Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County.

How will battery storage impact New York City's future?

"Battery storage will play a significant role in advancing New York City's just transition to a clean energy future and will help to replace dependency on highly pollutive peaker plants that emit dangerous pollutants - ultimately creating a brighter and healthier future for all New Yorkers," said NYCEDC President & CEO Andrew Kimball.

What is the capacity of the battery storage project?

The 15 MW/60 MWh distribution-level project will help provide more renewable power by replacing existing generation planned to retire in 2025. Once completed, the project will be the largest battery storage installation in New York City.

How many MW can a New York battery storage facility hold?

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest battery storage installations in New York State.

What is the northern New York energy storage project?

"The completion of the Northern New York Energy Storage project marks an important step to reaching New York's energy storage and climate goals." The project, located in Chateaugay, about 40 miles northwest of Plattsburgh, is the Power Authority's first utility-scale battery project and the first one built by New York State.

Where is a battery energy storage project located?
