

Niue dima solar

Does Niue use solar energy?

Over the last 5 months the total integrated system has resulted in 28.6% of Niue's electricity coming from solar renewable sources, saving over 130,000 litres of diesel. Find out more about Vector Powersmart

How did the Niue solar project work?

Working on the existing solar plants to establish communication with the Niue Central Power Station. Installing 600kW of solar to increase the islands overall solar capacity to 1.1MW of solar generation. The solar array was installed well inland on high ground to avoid any potential damage from cyclones in the future.

What is Niue's energy roadmap?

Under the new energy roadmap, Niue has set a goal of 80% renewables by 2025. According to Radio New Zealand, while the main focus of Niue's energy transition will be on solar power; the potential of other renewables such as wind power, biomass and wave energy will be investigated.

Where is Niue located?

Niue, the largest unpopulated coral atoll in the world, is situated in the South Pacific Ocean, some 2,400 kilometres northeast of New Zealand. Like many island nations, Niue is heavily dependent on diesel fuel for power generation.

What will New Zealand do with the Niue ocean wide trust?

The project will bring Niue's renewable generation to 80 percent. New Zealand will also commit \$2 million to the Niue Ocean Wide Trust, which aims to develop a blue economy and ensure long-term ocean conservation and climate resilience.

How long can Niue run without a generator?

Through the addition of an EMS, BESS and more solar to the network Niue can often operate without any diesel generators running for up to 10 hours at a time - on average the generators are switched off for 5-7 hours per day.
