Total Green Solutions | 196 followers on LinkedIn. RE100/Net Zero/Decarbonisation related Consulting & Transaction Advisory Services | Founded in October 2021 with a vision to become the most ...

We note electricity security concerns in Norway as we expect increased consumption from electrification, leading us to increase our consumption forecasts for Q223 to add 27.4TWh by 2032, while also highlighting upside risks to this from Norway's decarbonisation plans. Norway's energy commission urges haste in power expansion to meet demand.

At Greentech Solutions, we are committed to developing sustainable energy solutions tailored to the unique needs of businesses operating hydropower plants. Our expertise allows us to optimize energy production and profitability for our clients, ensuring they remain competitive in ...

In Norway, green bonds uptake may have been hampered by competition with high yield investments in oil & gas and shipping, a "green" energy sector that considers green bonds to be superfluous ...

The data centre industry is experiencing massive growth, resulting from an explosion in the volume of internet traffic, artificial intelligence (AI), Internet of Things (IoT), autonomous vehicles, robots, and high performance computing.

A green shift in Norway. As the oil age comes to an end, there is broad acceptance across the political spectrum that Norway needs to find a new industrial base. Recently, many players have called for a significant green investment to kick-start the Norwegian economy. Amongst them, the Labour party's Espen Barth Eide and Are Tomasgard ...

Global investors and markets look to Norway for innovative solutions, especially when it comes to sustainability and the green transition. Norway is a proven innovation leader, ranking in the top 25 of the Global Innovation Index (GII). Among high-income countries, it performs above average on key innovation metrics such as creative outputs, business and ...
