

Ogobon energie ltd Ecuador

What is OGB energy?

OGB Energy LTD. OGB Energy is an international renewable energy company, providing the very latest technology in hydro and solar energy. OGB Energy is an international renewable energy company, providing the very latest technology in hydro and solar energy.

How does Ecuador get its energy?

Ecuador derives the vast majority of its energy supply from oil, particularly in the transport and industrial sectors. Hydro power is also a key energy source, accounting for more than 62% of installed electrical capacity and nearly 78% of electricity generation in 2020, with fossil fuels providing most of the remainder.

Does Ecuador have a natural gas market?

Ecuador's natural gas market is less developed than its oil sector; it has a 0.9% share of total energy production and 1.7% share of energy consumption (Figure 1). Natural gas in Ecuador is mostly used by the industry sector.

Why is Ecuador converting oil-fired plants into natural gas?

To compensate, Ecuador currently relies on oil-fired plants for non-hydroelectric power generation. The government is committed towards converting old oil-fired plants into natural gas-fired facilities to meet demand and to reduce costs and emissions.

Which oil company produces the most oil in Ecuador?

Petroecuador is the country's top oil producer, accounting for an estimated 80% of Ecuador's output via its subsidiary Petroamazonas. Petroecuador controls the country's crude oil processing capacity through Petroindustrial, its refining subsidiary.

What is Ecuador's largest hydroelectric plant?

The launch of several large facilities since 1983 has solidified the hydropower sector's leading role in Ecuador's electricity generation mix (Table 3). The Coca Codo Sinclair Hydroelectric Plant, located on the Coca River in Napo Province, is Ecuador's largest hydroelectric facility, with a capacity of 1,500 megawatts (MW).
