Schnakofsky also didn't go as far as saying the market had commoditised but said that there was now less differentiation than in the third-generation BESS era: "Not everyone is buying exactly the same 20-foot container BESS. I think a lot of the componentry, maybe 80%, is standardised and I suppose commoditised."

## Role of system integrators

Was ist ein Container-Energiespeichersystem? Beim Container-Energiespeichersystem handelt es sich um große Lithium-Energiespeichersysteme, die in robusten, tragbaren Versandcontainern installiert sind. Die Größen reichen üblicherweise von 5 Fuß, 10 Fuß, 20 Fuß bis 40 Fuß; und der Schwerpunkt liegt hauptsächlich auf 50 kWh bis 10 MWh.

It is to be noted that Envision ventured into the 20-foot container-class of battery systems for grid-scale deployments last year. Recently in June this year, the company launched its 5 MWh containerized liquid-cooled BESS adhering to the highest safety standards and performance levels. It employs 315 Ah LFP battery cells, also sourced from AESC.

RESS A/S offers 20-foot generic BESS containers: Container capacity of 3.44-5.0 MWh, currently sourced from leading manufacturers: RESS prioritizes working with manufacturers who produce the cells as well as the BESS container, complete with cooling, fire safety measures, and other essential components. ...
