

Utilities in Africa should tap the PAYGo model's potential to expand appliance ownership through responsible consumer finance. What could PAYGo "on the grid" look like? At the core of the PAYGo financing model is a control unit that directs solar power from a battery to the appliances financed by the customer.

Just as mobile phones leapfrogged landlines to bring connectivity to even the most remote corners of the globe, pay-as-you-go (PAYGo) solar has been hailed as a breakthrough solution -- bringing clean, ...

Azuri PayGo Energy has combined solar and mobile phone technology to bring clean energy to people living in Sub-Saharan Africa. The pay-as-you-go solar home system provides eight hours of emission-free lighting each day and enough power to charge mobile phones. After paying a small one-time installation fee, the user then purchases a scratch card, or uses an integrated ...
