What are some open-source datasets related to solar energy?

Here are some open-source datasets related to solar energy along with their links: National Renewable Energy Laboratory (NREL) Solar Radiation Data: This dataset includes solar radiation and related climatic data for locations in the United States and its territories.

Is solar photovoltaic a viable energy source?

Provided by the Springer Nature SharedIt content-sharing initiative Solar photovoltaic (PV) power generation, known for its affordability and environmental benefits, is a key component of the global energy supply. However, the lack of comprehensive, timely, and precise global PV datasets has limited spatial analysis of PV potential.

Is energy storage a viable option for utility-scale solar energy systems?

Energy storage has become an increasingly common component of utility-scale solar energy systems in the United States. Much of NREL's analysis for this market segment focuses on the grid impacts of solar-plus-storage systems, though costs and benefits are also frequently considered.

What is the global installed capacity of photovoltaics in 2022?

According to the data provided by the International Energy Agency (IEA), the global new installed capacity of photovoltaics in 2022 was 133 GW, while the cumulative installed capacity reached 843.0 GW. In 2023, global installed renewable energy capacity additions are expected to increase by 50% compared to 2022.

What is the IOU of a solar panel dataset?

Comparing the produced 2019-2022 PV dataset with the currently sole global solar panel spatial dataset 30 (Kruitwagen et al., 2021), the new dataset achieves an IoU of over 90% for PV in each year, surpassing the IoU of Kruitwagen's dataset (Fig. 5c).

How accurate is a global PV dataset?

The dataset was evaluated with IoU and F1-Score metrics, achieving over 90% accuracy. Compared to existing datasets, it provides better precision and spatial detail, showing global PV growth of over 60% between 2019 and 2022, with developing countries leading the increase.
