

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What are Portugal's Energy and climate policies?

Portugal's energy and climate policies push for carbon neutrality, primarily through broad electrification of energy demand and a rapid expansion of renewable electricity generation, along with increased energy efficiency. There is a strong focus on reducing energy import dependency and maintaining affordable access to energy.

How does Portugal support the energy transition?

The transition is supported by both national policies and European Union (EU) funding. Key government energy transition achievements and targets: Increased renewables share: Portugal has invested heavily in renewable energy sources, particularly wind and solar power.

Does Portugal have a high energy demand?

Portugal has also achieved a high level of electrification. In 2019, electricity covered 25% of total final energy demand, 56% of building energy demand and 25% of industry energy demand. Portugal has also achieved high shares of renewable energy, which covered 30.6% of gross final energy demand in 2019.

What is Portugal's energy import dependency?

In 2019, Portugal's energy import dependency was 74%, one of the highest levels among IEA member countries. Portugal has made progress on reducing energy import dependency by increasing the share of renewables in the energy supply, especially for electricity.

What is Portugal's Energy Plan?

Portugal's plan dedicates notable funding to the energy sector, with funding for sustainable mobility, energy efficiency, renewables, decarbonisation and bio-economy.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of ...
