

# Portugal pwa energy solution

What is Portugal doing to reduce energy consumption?

Portugal is taking firm steps to reduce energy consumption, use its resources more efficiently, provide more sustainable mobility, achieve greater security of supply, and diversify its renewable energy footprint. Energy Solutions is one of the areas where Portugal stood out at HANNOVER MESSE'22.

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What is Portugal's energy transformation?

Portugal's transformation is more than just about energy production; it's a narrative of resilience, innovation, and community spirit. As the country forges ahead, its commitment to renewable energy serves as a powerful reminder that a brighter, greener future is possible, and it begins with each of us.

Does Portugal have a high rate of green energy consumption?

Portugal boasts one of the highest rates of green energy consumption in Europe. From 30 May to 2 June at HANNOVER MESSE '22, companies from Partner Country Portugal showcased their technological solutions for clean-energy production and demonstrate to the global market Portugal's vast know-how and experience in the renewable electricity sector.

Why is wind energy important in Portugal?

Wind energy remains a crucial component of Portugal's electricity production, accounting for 25% of the total. Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way.

Our platform automates and simplifies core operations including billing, liberating energy companies to rapidly innovate exceptional customer experiences at a lower cost. Our demand response capabilities optimise energy flows across millions of devices to propel us to a future where renewable energy is abundant, affordable and accessible for all.

# Portugal pwa energy solution

While Portugal thrives, the International Energy Agency (IEA) warns that the global target set during COP28 to triple renewable energy capacity by 2030 may be in jeopardy. The IEA's latest report suggests that worldwide renewable capacity is only expected to increase by 2.7 times from 2022 to 2030, a figure that falls short of the ambitious ...
