USAID has invested in the analysis undergirding Armenia's new energy strategy, which aims to diversify the sources of energy on which it draws. So it is not so dependent on external sources, so that it can take advantage of the incredible sunshine that the Armenian people get to enjoy every day. So that it can think about nuclear power in a modern way to ...

(The remainder of the electricity was generated by Armenia's hydroelectric stations and gas-fired power plants.) The Armenia of the 1980s was a tiny but prosperous Soviet republic that prided itself in a highly educated labor force, an array of scientific institutes, and a vibrant electronics industry that produced some of the early Soviet ...
