The Energy Transitions Initiative's island energy snapshots highlight the energy landscape of islands in the Caribbean, the Pacific, and the surrounding areas, which have some of the world's highest electricity prices in the world. ...

The following section uses the most recent trade data from partners of Northern Mariana Islands. Disclaimer: data is presented based on availability and only countries that use the harmonized system are being shown. * Trade values are converted to USD using each month's exchange rate. For December 2023 data, the exchange rate from December 30 ...

A second installation phase has been completed at TotalEnergies' battery energy storage facility in Dunkirk, northern France, bringing its output and capacity to 61MW / 61MWh. The battery energy storage system (BESS) was already France's biggest system of its type -- at 25MW / 25MWh -- when it was inaugurated in January 2021.

BESS route-to-market (RTM) and optimisation firms in the UK are increasingly looking at a wider variety of contracting mechanisms beyond the revenue-share or "merchant" model, developer-operator Eku Energy told Energy-Storage.news.

TY - GEN. T1 - Energy Snapshot - Commonwealth of the Northern Mariana Islands. AU - NREL, null. PY - 2020. Y1 - 2020. N2 - This profile provides a snapshot of the energy landscape of the Commonwealth of the Northern Mariana Islands (CNMI), a commonwealth in political union with the United States that is located in the northern Pacific Ocean.

Energy-Storage.news reported a while back on the completion of an expansion at continental France's largest battery energy storage system (BESS) project. BESS capacity at the TotalEnergies refinery site in Dunkirk, northern France, is now 61MW/61MWh over two phases, with the most recent 36MW/36MWh addition completed shortly before the end of ...

The goal is on the lower end of the existing targets and mandates adopted by US states so far. Most recently, Connecticut passed a 1,000MW by 2030 deployment target, which state Governor Ned Lamont signed last week. At the upper end of the scale are Virginia's 3.1GW by 2035 and New York's 3GW by 2030 targets.
