

Satec powerful solutions Mexico

SATEC ofrece más de 25 años de experiencia en el campo Smart Grid que cubre prácticamente cualquier segmento de la red, incluyendo: Sistemas de supervisión de centrales eléctricas que monitorean la energía, la calidad de la potencia, así como los parámetros operativos que permiten la planificación y el costo de la generación. ...

Based on the PRO Series meters, SATEC provides a unique comprehensive solution for DC metering. The current sensing technology used by the PRO is that of Hall Effect Sensors. The voltage reading is performed by direct measurement, rated up to 820V DC. The challenges that arise in this application: Hall Effect Sensors require an external power ...

Cost-effective: saves drastically on installation costs and space occupied by dozens of legacy meters. Multi-circuit: multi-load metering. up to 12 three-phase loads; up to 34 single-phase loads; various combinations of the two; Revenue ...

The PM130. Utilizing shunt resistors, the PM130 offers a basic cost-effective DC metering solution, suitable for retrofit installation in facilities where the shunts are already in place. This is the case quite often in the telecom market.

Power quality monitoring has been SATEC's core expertise since its foundation. Over the years our solutions have evolved to include numerous helpful features and advantages within the field of power quality analysis: Class A, Ed. 3 certified analyzer; Fast transient detection; Disturbance Direction Detection (see note below)

Multi-Function Power Quality Analyzer. EDL180 Portable Power Quality Analyzer. PM180 based portable version. EM720 Revenue Meter & PQ Analyzer. Wall-mount version. EM920 ... Learn about SATEC Solutions See solutions . We ...

Discover SATEC's Renewables & Generation, an energy management solutions for optimal performance and sustainability. Dive into how Renewables & Generation can transform your energy management. ... Renewable energy also entails unique challenges such as the prevalence of DC power systems and more. These PV farms or wind farms are often related ...

RGM180-G3. Featuring all the G1 characteristics, the RGM180-G3 is used as a remote monitor for reading and controlling up to 32 units of any compatible SATEC devices (see Highlights tab) over RS-485, or up to 36 SATEC devices over 10/100 Base-T Ethernet.. This screen model must be Powered over Ethernet (PoE) or via

Satec powerful solutions Mexico

an external power supply (supplied with unit).

La solución completa ExpertPower (TM) de SATEC, combinada con nuestra amplia gama de medidores, proporciona información y análisis para mejorar la eficiencia, confiabilidad, seguridad y rentabilidad de los sistemas de energía de nuestros ...

SATEC - Solutions And Technology for Energy Control. SATEC's presence in Australia brings together 40 plus years of experience and knowledge for Energy Management Solutions. The culmination of local expertise and SATEC's Global leadership in metering, power quality analysers and software provides a source of knowledge to satisfy customer's ever ...

SATEC BFM-II is the second generation of the Branch Feeder Monitor(TM), providing energy management for multi-point power solutions. Ideal for both new and retrofit projects, the BFM-II automatically provides metering, demand and energy readings, logging and ...

A Phasor Measurement Unit, or PMU for short, is the essential building block in the platform called Wide Area Monitoring System (WAMS). These systems were developed to provide an overall real-time health check of nation-wide transmission grids, predicting and helping to prevent power failures, analyzing those which did take place.

Gracias a su versatilidad, se ajustan perfectamente a instalaciones nuevas y existentes. ? Monitoreo Preciso y en Tiempo Real. ? Gestión Remota con ExpertPower. ? Ideal para ...

Cost-effective: saves drastically on installation costs and space occupied by dozens of legacy meters. Multi-circuit: multi-load metering. up to 12 three-phase loads; up to 34 single-phase loads; various combinations of the two; Revenue Meter:. Class 0.5/0.5S accuracy per ANSI C12.20 / ...

Measure, Analyze, Optimize and Save Expertpower is a comprehensive energy management software suite offering a range of applications. These include Meter Data Management (MDM), billing, monitoring, business intelligence (BI), energy efficiency, demand response, in-depth power quality analysis, and support for core planning and forecasting processes of independent ...

For over a decade SATEC has pioneered the implementation of this advanced communication protocol, starting with its flagship, the PM180 power quality analyzer. Ever since, SATEC has set the goal of implementing IEC 61850 in its leading products, new releases, as well as legacy products. See below SATEC products featuring IEC 61850.

Discover SATEC's Commercial, an energy management solutions for optimal performance and sustainability. Dive into how Commercial can transform your energy management. ... such as demand, power factor and more. Proper energy management guarantees that body corporate does not lose on the energy supplied with its premises but rather even gains at ...

The PM172 is a Class 0.2S/0.2 power meter designed for high-accuracy metering of three-phase AC circuits. Equipped with built-in digital I/Os and supporting numerous communication protocols, it is suitable for integration in utility substations or industrial SCADA systems.

Portable (Class A, Ed. 3) PQ Analyzer. The EDL180 is a portable version of the Class A (Edition 3) PM180 power quality analyzer, which holds extensive track record serving as the platform for power quality monitoring systems in worldwide national grids. Equipped with a 24V battery for backup power supply and flexible current clamps, it is fitted in a lightweight traveling bag for ...

Satec Powerful Solutions es uno de los pocos fabricantes dedicados en exclusiva al diseño y fabricación de equipos analizadores de parámetros eléctricos, ...

Power: True RMS volts, amps, power, power factor, neutral current, angles and unbalance for voltage and current, frequency, symmetrical components and many more; Event and parameter data-logging; Sampling frequency: up to 1024* samples per cycle; KYZ or KY output and LED indication for calibration and test (via optional display)

A bright 7-segment LED display, accompanied by a LED load-bar, enables easy on-site access to power parameters and viewing of load percentage at a glance. DC Metering The PM130 allows also Direct Current (DC) metering via shunt, ...

Based on the PRO Series meters, SATEC provides a unique comprehensive solution for DC metering. The current sensing technology used by the PRO is that of Hall Effect Sensors. The voltage reading is performed by direct ...
