Does Sierra Leone need rural electrification?

There is currently no entity in Sierra Leone with a specific mandate to drive rural electrification in the country. This is being run by various departments in the Ministry of Energy and SLEWRC. The 2018-2030 plan, however, has set plans for the formation of a Rural and Peri-Urban Electrification Authority.

Does Sierra Leone need a reliable energy supply?

The nationwide electrification rate was recorded at 5% (estimated at 12% in urban areas and 2% in rural areas) in 2018 with roughly 150,000 connected customers. The country's energy needs are hugely under served, and the lack of a reliable energy supply is the primary obstacle to Sierra Leone's development.

How much power does Sierra Leone need?

Sierra Leone aims to increase its installed capacity to 350MW by 2023. Currently, the country has an installed capacity of 100MW and plans to fully utilize its potential to exploit the 1,240 megawatts capability for local consumption and export in the sub-region.

Why is solar power costly in Sierra Leone?

Solar power is delivered at a very high cost in Sierra Leone, despite the country having an estimated hydro project potential of more than 1000MW and abundant sunlight for solar power generation, with opportunities above 240 MW.

How much energy does biomass produce in Sierra Leone?

The programme is currently replacing old fridges. As of 2017, the total installed capacity generated from biomass was 33 MW with a potential to generate 2.706 GWh. According to the 2015 Population and Housing Census, 97% of the population in Sierra Leone use firewood or charcoal for cooking.

Could wind energy be a viable option in Sierra Leone?

There is some indication that wind speeds of 12 m/s are possible in parts of the country, implying that wind energy could be a viable option in selected locations. Currently, Sierra Leone has one wind energy system of 5 kW located in the Bonthe District, along the southern coastline.

Wind Energy. Sierra Leone's best wind velocities indicate a country-wide average of between 3 m/s and 5 m/s, increasing to approximately 8 m/s in some mountainous areas (Metrological Statistics, 2012). There is some indication ...

The Solution - Solar Microgrids Powering Hospitals & Clinics Across Sierra Leone. In early 2023, SEforALL, working closely with the Ministry of Health and Sanitation (MoHS) in Sierra Leone, introduced the Sierra Leone Hospital Electrification Project. The initiative highlighted the integration of renewable and dependable energy solutions in hospitals to ...
