El Salvador's masterplan for renewable energy development indicates that up to 682MW of renewable capacity could be added by 2026. This would be comprised of approximately 160MW of small hydro, 200MW of solar thermal, 90MW of solar PV, 60MW of wind and 60+MW of geothermal along with smaller capacities of biomass and biogas.

AES invested US\$ 300,000 in the construction of the SmartGrid, which is in the San Salvador metropolitan area. AES El Salvador highlighted that during the next few years, through its facilities, it will allocate US\$ 3.3 million in the development and operation of 12 new smart grid projects in different parts of the country.

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, ...
