

Egypt's new solar power project in Djibouti aims to provide alternative energy sources for the Horn of Africa nation, reducing its reliance on Ethiopia. The project includes the installation of a solar plant with potential for expansion. Economic benefits were stressed during the agreement's...

That's because this year's "uniquely high" installations were driven by the expiration of a two-year moratorium on tariffs targeting solar panels made in Southeast Asia, S & P wrote. That pause, which ended in June, allowed companies to stockpile cheap panels, but developers were required to use up that inventory by December 3 to avoid paying duties.
