

Solar land lease companies Lithuania

Why should Lithuania invest in solar energy?

To be an active partner of society, politicians and business, creating a suitable and sustainable environment for the development of solar energy in Lithuania. We unite solar energy market players to inspire, encourage and help Lithuania to use solar energy as a clean, renewable source of energy, ensuring energy independence and a secure future.

Can I lease my land for a solar farm?

Leasing your land for a solar farm can help you create a steady income for 25+years. Contact us today and find out if your land is suitable for a solar farm.

What does it mean to lease your land for solar?

Leasing your land for solar means allowing a solar company or developer, like OYA Renewables, to design, permit, construct, and operate a solar energy system on your property in exchange for payment or compensation, typically for a set period (e.g. 25 years).

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

How long does a solar farm lease last?

The lease requires the landowner to dedicate a portion of their land to solar for a set period, typically 20-25 years. During the operational period of the solar farm, the use of that portion of the land is limited and may require permission from the solar company.

Does a landowner have to maintain a solar farm?

The landowner receives annual lease payments and has no obligation to maintain the solar farm. The team at OYA believes in long-term, trusted partnerships with landowners that are built on integrity and reliability. Our knowledgeable project developers will guide you through each step ensuring that any questions or concerns are addressed.

These new laws have created a so-called "land rush" from out-of-state solar developers seeking to obtain interests in land from Maine landowners for potential solar development. Typically, these interests come in the form of a solar lease between the landowner who becomes the landlord and the developer who becomes the tenant.

"An option is a contract that gives the optionee a right to do something - such as buy or lease land-for a specified period of time," Dessy explains. "It does not give you an interest in the property, only the right to
