

Solar panel energy system Philippines

A typical air conditioner will use 1200 to 1500 watts of power. Thus, if your solar panel is capable of generating 250 watts of power, then you will need 6 solar panels. Larger air conditioning units will require more solar panels. You can use our solar panel calculator to find the exact number of panels you will need.

Solar energy may lessen your utility costs by 30-50% as you generate your own electricity from a home solar energy system. With solar panels on your home, you can use electricity for free during the day. As an alternative energy source, solar panels in homes in the Philippines help reduce the use of non-renewable energy.

Metro Manila, Philippines - When thinking about getting a solar energy system, most people expect these systems to include a battery. PHILERGY German Solar is your reliable, high-quality German Solar supplier and installer in the Philippines.
