Can a solar roof be integrated with a planum tile?

Our Solar tile combines perfectly with our Planum ceramic tile, so the system will be fully integrated with the roof. Planum Solar tiles are made from premium mono crystalline cells and the glass technology that surrounds them is very sturdy and durable in extreme weather conditions.

Why should you choose a roof tile with or without solar cells?

This ensures that your roof can be designed with exactly the Watt-peak (solar cell performance) that makes sense for the consumption your household has. There is a minimal visual difference between a roof tile with or without solar cells, and it can actually only be seen if one looks at the tiles closely and from above.

What is a solar roof?

A Solar roof is classified as a lightweight roof, which reduces the requirements for the subroof construction. It only weighs 14 kg. per m² and is therefore lighter than most conventional roof types, making it suitable for older roof constructions. Solar roof is Danish developed and produced in the EU.

What is a combined solar roof tile and a battery solution?

The combined solar roof tiles and a battery solution offers an easy-to-use monitoring system so you can track your solar roof system's performance, monitor the amount of energy it stores and how much you're saving on your energy bill.

What is a solartag roof?

With its integrated solar cells beneath the matte surface, a Solartag most resembles a slate roof. As a screwless roof, it is significantly faster and easier to install - both for the carpenter and for the DIY enthusiasts.
