

Solar totalenergies China

How much solar power does totalenergies have in China?

Over the past 5 years, TotalEnergies has seen rapid growth in its solar power capacity for commercial and industrial customers in China, reaching 500 MW installed capacity by the end of 2023.

Will totalenergies invest on solar power project to broader Chinese customers?

The continuous efforts to invest on solar power project to broader Chinese customers will be based on TotalEnergies' existing portfolio that already covers over 18 provinces in China, with more than 200 commercial and industrial customers, with a diversified presence including the automotive, manufacturing, consumer goods, and food sectors.

What makes China a great market for distributed solar generation?

China is the largest market for distributed solar generation and a cornerstone of our ambition to continue to grow in this renewable energy sector. The high quality of the portfolio, mutual trust and long-term relationships with our customers have been decisive.

What is totalenergies doing with Cathay Capital & Dajia insurance?

TotalEnergies is teaming up with a Chinese innovation investment fund co-developed by Cathay Capital and Dajia Insurance, to finance and operate solar power projects for commercial and industrial customers in China.

Will totalenergies grow its power generation to 100 TWh by 2030?

TotalEnergies will continue to expand this business to grow its power generation to more than 100 TWh by 2030, with the objective of being among the world's top 5 producers of electricity from wind and solar energy.

About TotalEnergies

How much electricity did totalenergies generate in 2022?

In 2022, TotalEnergies generated more than 33 TWh of electricity, and had a gross renewable electricity generation installed capacity of 17 GW.

Unrivalled renewable energy news. Recharge is the world's leading business intelligence source for the renewable energy industries. We provide award-winning international coverage of breaking news, in-depth features and analysis across the wind and solar sectors.

Paris, January 13, 2021 - Total and Engie have signed a cooperation agreement to design, develop, build and operate the Masshyla project, France's largest renewable hydrogen production site at Châteauneuf-les-Martigues in the Provence-Alpes-Côte d'Azur South region. Located at the heart of Total's La Mède biorefinery and powered by solar farms with a total capacity of ...
