

South Sudan commercial solar applications

Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Should solar energy be adopted in The Sudan?

Theoretically, technically, and long term, there are huge potentials for solar energy adoption in The Sudan. The present transition phase requires a serious practical focused strategy to make positive contributions to its energy sector and development altogether.

Can solar technology help Sudan achieve its national goals?

Solar technology can play a key role in helping Sudan achieve its national goals (Intended Nationally Determined Contributions, No Date, p.9). Apart from providing energy, it could contribute to sustainable development and reducing poverty in Sudan. Long term negative impacts of climate change could also be mitigated through the use of solar technology.

South Sudan 0. Spain ... In the current scenario, for example, commercial prices for solar have dropped by 58% since 2012. However, the latest policy changes suggest that it will not be the case in the future anymore. ... Founded in 1997, Trina Solar Ltd. delivers PV products, applications, and services to promote global sustainable development.
