Man this blows my fking mind. I have been casual for 3 years. Took be 2 years to go from 250-262. I get passed by people who put in hard work and grind it out all the time.

2nd November 2022 Erda's geo-exchange technology pushes University of Sheffield closer to Net Zero goal . Erda Energy continues to deploy low carbon heating technology in the education sector with their latest installation set to supply heating and cooling to the new world-class Faculty of Social Sciences Building at The University of Sheffield (TUoS).

2nd August 2023 System Carbon Content of Erda's heat . The Erda | smart(TM) dashboard gives insight into Erda's geo-exchange system and is designed to enable users to explore the data through different performance metrics. It exemplifies Erda's progress towards achieving net zero emissions, enhancing transparency and ensuring accountability.

Throughout the past decade Erda Energy has been developing a range of unique solutions, which now play an important role in helping clients achieving net zero operational carbon. Proven geo-exchange technology paired with our Erda | smart(TM) platform has aided clients reducing thermal and electrical energy demand while also eliminating the use ...

Erda Energy's patented coaxial inclined borehole technology harnesses the energies created in heating and cooling processes, feeding this back into a building in real time, or storing it for later use as needs fluctuate. The result is a closed loop system that provides heating, cooling and storage of energy on a more efficient basis than ...

Erda Energy is thrilled to share a closer look into the geo-exchange system providing low carbon heating and domestic hot water on the Gipsy Lane campus at Oxford Brookes University?? This ...

22nd September 2022 Erda co-operates with supermarket chain to develop next step in geo-exchange technology . Erda's new geo-exchange installation at a supermarket store in the North of England uses an innovative new technology, which utilises the placement of a synthetic load on the store's refrigeration system to bypass the need for an external heat pump.
