

# Sunvault battery cost United Kingdom

With the signing of the historic Inflation Reduction Act, homeowners may be even more incentivized to seek resiliency with battery solutions like SunVault. Beginning in 2023, customers may be eligible for a 30% tax credit for battery technology when purchasing battery storage, even if they already have solar. About SunPower

The SunVault battery has a depth of discharge (DoD) of 92%. This means that you can use up to 92% of the battery's stored energy before it needs to be recharged. The battery also has a high round-trip efficiency of 86%. This means that 86% of the energy that is used to charge the battery is available for use when the battery is discharged.

**Battery Capacity.** The SunVault Storage 13 model has a usable capacity of 12 kWh and a storage capacity of 13 kilowatt-hours (kWh), given it is paired with a solar array that has adequate sunlight and production capabilities. The SunVault Storage 13 is able to provide a full day's energy back up during cloudy conditions or low/limited light on ...

I'm comparing quotes from solar installers, and I'm looking to get a home battery with my system. I have a quote from a local installer for an Enphase IQ 10 and a quote from Sunpower for a SunVault 13. In general, it seems like the SunVault has the better warranty, better capacity, and higher output/power.

**Using Your SunVault System.** In general, your SunVault solar battery storage system requires no day-to-day operation on your part. During the day, your SunPower Equinox system uses solar energy to power your home, and any excess solar energy produced charges your SunVault battery. \* Your battery storage system's ability to provide electricity to your home will vary ...
