

Sweden erma energy

Who is ERM & renewable Sweden?

ERM, the world's largest pure play consultancy, has announced a Memorandum of Understanding (MOU) with Renewable Sweden to offer joint best in class offshore wind services to support Sweden's energy transition.

What is the Swedish Energy Agency?

The Swedish Energy Agency is a government agency responsible for matters of the supply and use of energy in Sweden. The Agency is in many aspects leading Sweden's transition to a sustainable energy system. The organisation is regulated by the Government through the instruction and annual appropriations directives.

How does Sweden use energy?

Energy losses in the system can come from conversion and transmission, or that energy commodities are used for other purposes. In Sweden, we make use of our own renewable energy sources such as water, wind, sun, and biomass. We also import nuclear fuel, biofuels, and fossil fuels such as oil and natural gas.

What is an example of a flow of energy in Sweden?

Losses and non energy use. Energy flows within the Swedish energy system are presented in the Sankey diagram. An example of a flow in the diagram is: Supply of energy from wind, water and sun to the energy system. The energy is converted into electricity. The electricity is used in industry, transport, and the residential and service sector.

What is the Swedish energy system?

The Swedish energy system can be divided into supply, transformation, and consumption of energy. The energy system consists of supplied energy in the form of primary energy that is converted and transferred to the final energy users. The energy system is always in balance. This means energy input is always equal to the energy use, including losses.

How can ERM help Sweden achieve net-zero emissions by 2045?

Its services include market analysis, permitting, stakeholder management and lobbying. Combined with ERM's extensive end-to-end expertise in renewable energy services, the partnership is designed to help Sweden accelerate its energy transition in line with its goal of reaching net-zero emissions by 2045.
