

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

Does the European Investment Bank support a new solar plan in Gambia?

Mr. Ambroise Fayolle, Vice-President at the European Investment Bank (EIB) "I am delighted that the European Investment Bank is supporting this new solar plan with such economic and social impact for populations in Gambia, particularly in rural areas.

How does a large scale solar PV project benefit the Gambia?

The project contributes to gainful employment creation in The Gambia with 1,250 direct jobs created from the construction phase to operation and maintenance. To ensure sustainability, a three-year operations and maintenance contract (O&M) has been signed as large scale solar PV is entirely new to the sector.

These are the goals the UN is working on in The Gambia. The Resident Coordinator leads the UN Country Team (UNCT) and ensures that the UN agencies support the national development priorities through three UNDAF outcome areas. These are: (i) Governance, Economic Management and Human Rights supporting initiatives aimed at strengthening national ...

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar ...

The Gambia, a country on the western coast of Africa, fronting the Atlantic Ocean. Senegal encloses the country on the other three sides. Straddling the Gambia River, the country extends eastward for about 320 km (200 mi) from the Atlantic Ocean. At its widest, this narrow country measures only about 50 km (30 mi) across.

During World War II, Gambian troops fought with the Allies in Burma. The Gambia's capital city served as an air stop for the U.S. Army Air Corps and a port of call for Allied naval convoys. The Gambia became independent from the United Kingdom in 1965. In January 2017, Adama Barrow was sworn in as president, as head of a

The Gambia is a narrow strip of land. It is 295 miles (475 kilometers) long but only 15 to 30 miles (24 to 48 kilometers) wide. Except for a short coastline on the Atlantic Ocean, The Gambia is surrounded by Senegal. The Gambia River flows westward through the country into the Atlantic. The Gambia has warm weather and a long dry season each year.
