Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Can Timor-Leste generate solar energy?

As almost the whole territory of Timor-Leste has the potential to successfully generate solar energy, the Government is keen to tap into this potential to setup utility scale solar plants as well as off-grid lighting solutions for remote localities.

How much does electricity cost in Timor-Leste?

The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries. For instance, in Indonesia industrial electricity tariffs are 0.11 USD/kWh, compared to 0.24 USD/kWh in Timor-Leste.

Can solar power help Timor-Leste & Atauro Island?

Across Timor-Leste, a lot more people now have access to electricity, which is certainly a promising development. Yet, on Atauro Island, solar technology continues to serve a crucial need for safe, clean, bright light at night. originally published by Sally Bolton (Kopernik) on LinkedIn.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

How many people in the Pacific and Timor-Leste do not have electricity?

Significant progress has been made to increase electricity access across the Pacific and Timor-Leste. However, there are still around 3.7 million people in the region, including a disproportionate number of women, who do not have a reliable and affordable source of energy.
