

Trackso solar Lesotho

What is trackso solar?

TrackSo Solar is a cloud based energy management IoT platform to track your solar PV system's performance, identify anomalies and provide immediate support, giving you a full control over your system without actually being present there.

What is trackso & energy management?

Manage your assets from anywhere, anytime. Trackso simplifies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize system performance and minimize maintenance costs.

What is trackso & IoT & energy management?

Trackso simplifies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize system performance and minimize maintenance costs. If playback doesn't begin shortly, try restarting your device.

What is trackso & how does it work?

Be the first to get notified of New Products, Services and Platform Updates. TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

How does trackso monitor a solar thermal system?

TrackSo provides performance based monitoring for Solar Thermal Systems. How do we collect data of a Solar Thermal System? A temperature probe is attached to : Controller is connected to monitor the pump.

How to contact trackso for solar remote monitoring requirements?

Visit us at For any solar remote monitoring requirements, feel free to reach out to us at sales@trackso.in or call us at +91-8800606858/8800550886#trackso #eid #solarremotemonitoring #solarmonitoring #solarenergy #iot #dataloggers #powercontrol #dgsync #zeroexport

TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

A site on TrackSo Solar can have 5 no.s of users assigned to it. Users can be added with either admin or read only access type. Once a user is added to a site, it will appear in the "User Management" section with corresponding sites. List of ...

Trackso solar Lesotho

The section explains how to complete sign up on TrackSo and create an account to monitor your Solar Power Plant. Following are the steps: Go to the TrackSo User Sign-Up Page or If you have received a Invitation email, click on Accept Request.; Enter your email and set your password.

Imagine you're at your office and suddenly realize that your monitoring device at a remote site isn't working properly. Your client is asking for a fix, but the only solution is to send someone to the site to figure out the problem.

LoRa to Modbus RS485 Converters serve as intermediary devices that facilitate communication between the LoRa wireless protocol and the Modbus RS485 standard, which is widely used for serial communication in Solar Power Plants equipments (Inverter, Meter, sensors etc).. The converter essentially acts as a bridge, especially useful in distributed rooftop setups, ...

Watch TrackSo Live In Action! Our representative will walk you through TrackSo IoT/Solar platform & features using Zoho Meetings or Anydesk; We'll understand your challenges and show you how TrackSo can help fix or optimize them; The web demo can last anywhere from 20 minutes to 1 hour

We can monitor various points throughout a large solar loop, monitoring collector, tank, pipe temperature, as well as ambient temperatures, enabling quick and easy monitoring and troubleshooting. How it works?

With TrackSo's latest update we have enabled the feature to upload your company's logo in your TrackSo account. Now every time you log in to the TrackSo portal you can see your company's logo shining bright. Steps. Navigate to User > My Account in your TrackSo Account. Click on Update Logo field

Trackso simplfies the way you operate and maintain your assets. IoT & Energy Management A cloud-based IoT platform to enable you to monitor, operate and maintain your energy systems remotely, giving you full power to optimize ...

TrackSo API makes it easy for business users to build custom applications & integrate monitoring data with existing business tools. ... Use Cases. Create white-labelled Solar / Energy management solutions (mobile/web) Mobile ...

Learn how to use TrackSo Solar IoT Platform to monitor and analyse energy generation and performance of all your solar power plants. 2. Download Energy Reports. Learn how to download daily/monthly/yearly energy generation reports for your solar power plants. 3. ...

TrackSo is a data monitoring and data analytics platform for solar PV plants. It helps in tracking performance, spotting or predicting failures and providing information about appropriate O& M...

For monitoring solar inverters without a communication port or facility, you can use the following equipment

Trackso solar Lesotho

with Modbus RTU or Modbus TCP/IP output and monitor the inverter indirectly. ... Meters compatible with TrackSo Solar Remote Monitoring System: [https: ...](https://...)

Previous What is the impact of unbalanced load on Zero Export for Solar Power Plants Next How to verify the installation of Meters Installed on Grid side or Generator Output PRODUCTS & SERVICES ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised ...

For those seeking advanced solar monitoring solutions, TrackSo invites you to connect for a journey where excellence meets precision. Learn and then earn it the right way with TrackSo. Schedule a demo with us through mail at sales@trackso or call us at +91-8800606858. Support us and follow us on LinkedIn ?

TrackSo Solar Monitoring; Weather Stations; Solar Water Pumps; Zero Export; Solar- DG Sync; Select Page ~ You have logged out successfully ! ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business ...

Login Page - <https://solar.trackso/login>. Step-2. Enter email address of the Account and Submit. Step-3. Check your Email inbox for a password reset link. Step-4. Click on the URL provided in the email and Set a new password. Doc navigation <- User Management User Registration ...

Learn and get started with the TrackSo for monitoring of your solar power systems ... TrackSo is an IoT based SaaS product of Free Spirits Green Labs Pvt. Ltd. TrackSo monitors & manages energy assets to provide you with optimised information, hence allowing you to derive key business outcomes. Product is live since 2017.

Business Head @ TrackSo| Solar PV Monitoring & Analytics | Helping EPC, O& M, and OEM companies with solutions like Solar Remote Monitoring, DG Sync, Zero Export, Wireless ...

TrackSo runs on the same infrastructure that Google uses internally for its end-user products, such as Google Search and . All data is encrypted in transit between Google, the customers, and the data centers. The data stored on persistent disks is encrypted under 256-bit AES and each encryption key is also encrypted with a set of regularly changed master keys.

TrackSo's instant email alerts saved INR 7 Lakhs in generation loss! by Nehal Batra | Jul 4, 2024 | Blog. Detecting solar plant failures accurately in time is as critical as implementing the best products & practices for high performance. And honestly, it is only possible with an effective remote monitoring technology partner like TrackSo.

At TrackSo, we provide real-time data analytics (inclusive of remote monitoring of your systems, diagnostics, and data-driven decision-making) in addition to providing customized innovative solutions when required. For ...

Trackso solar Lesotho

At TrackSo, we provide real-time data analytics (inclusive of remote monitoring of your systems, diagnostics, and data-driven decision-making) in addition to providing customized innovative solutions when required. For those seeking advanced solar monitoring solutions, TrackSo invites you to connect for a journey where excellence meets precision.

A WMS is one of the key components in a solar power plant. It's function is to gather the data of weather parameters such as solar radiation, Module surface temperature, Ambient temperature, wind speed etc. at any solar pv site which helps to monitor the efficiency and performance of the power plant. ... TrackSo is an IoT based SaaS product ...

A Solar PV monitoring system is a cloud-based platform that can collect critical parameters from your solar PV system and make it accessible to you anywhere, anytime through an interface ... Trackso's remote monitoring system helps in gathering the following information from the inverters. Voltage, Current, Power and Energy on AC and DC sides;
