Does NGC own a gas pipeline in Trinidad and Tobago?

NGC owns, maintains, and operates most of Trinidad and Tobago's gas pipeline network of approximately 1,000 km, both offshore and onshore.

What role does oil and gas play in Trinidad & Tobago's economy?

The oil and gas sector plays a significant role in Trinidad and Tobago's economy, accounting for 27% of government revenue and 51% of export earnings in 2018. The island nation has a long history of oil and gas production, but has been mainly producing natural gas since the 1990s.

What is the role of NGC in Trinidad & Tobago?

NGC plays a pivotal role in Trinidad and Tobago's gas-based energy sector and is strategically positioned along the entire natural gas value chain.

Where is NGL located in Trinidad & Tobago?

NGL, a subsidiary of NGC, is located on the Point Lisas Industrial Estate in Trinidad and Tobago, where it operates a state-of-the-art cryogenic gas processing facility. It is engaged in natural gas processing and the aggregation, fractionation and marketing of natural gas liquids (NGLs), operating as an NGL hub.

Why did Trinidad and Tobago join the EITI?

Trinidad and Tobago joined the EITI with the objective of enhancing natural resource governance, promoting economic growth and reducing poverty. The government has been actively engaged with EITI implementation and remains committed to strengthen the systematic disclosure of extractives data.

How can Trinidad and Tobago use EITI disclosures?

There is scope for Trinidad and Tobago to use its EITI disclosures to provide further information on companies' environmental payments and the issuance of CECs and EIAs. The register hosted by the EMA should make efforts for full disclosure of CECs and EIAs in order for the public to understand the terms of these arrangements.
