

Turnkey residential ESS EPC contract price in Spain

What is an Energy Performance Certificate (EPC) in Spain?

An Energy Performance Certificate (EPC) in Spain is more than a legal checkbox -- it's your gateway to a more valuable, energy-efficient, and eco-friendly home. Whether you're selling your villa in Alicante, renting out your flat in Madrid, or just looking to cut down those rising energy costs, upgrading your EPC rating gives you a real edge.

How do I get an EPC in Spain?

Getting an EPC is simple. When you're selling your home in Spain, you'll have to find an accredited architect. They will then assess the energy efficiency of your property and provide you with a certificate that proves their assessment. If you fail to get an EPC report, you could be fined.

What is the energy label in Spain (EPC)?

The Energy Label in Spain (EPC): New Regulations and Opportunities for Your Property in Spain Key Points New regulations mandate that Spanish homes must have an energy efficiency certificate of level 'D' or higher by 2033. Currently, 80% of Spanish buildings have a low label, presenting opportunities for renovations.

Who needs an Energy Performance Certificate in Spain?

The property owner or developer who wants to sell or rent their property must have an energy performance certificate in Spain (this has been the case since 1st June 2013). In addition, both the owner and the developer are responsible for providing it to the buyer or showing it to the tenant. What is an Energy Performance Certificate for?

How long is an EPC valid in Spain?

The EPC in Spain is valid for 10 years and the owner will be responsible for renewing or updating it in accordance with the provisions of the competent body of the autonomous community. However, if the energy rating is G, the maximum validity of the certificate is five years.

What is an Energy Performance Certificate (EPC)?

The Energy Performance Certificate (EPC) is required by anyone who is renting a property out for four months or more or selling a property. It demonstrates how energy efficient the property is. Each house or flat is given a rating between A and G. The rating A is the most efficient and G the least.
