You cannot use the panels for power unless the grid is up. When the grid goes down so do the panels. Unless you lose power often and for extended periods of time it's not worth the \$\$ to utilize the panels for power. I have a 6500-watt generator just in case in the next 10 years I lose power and need the frig running.

SolarCity was founded in 2006 by brothers Peter and Lyndon Rive, [2] based on a suggestion for a solar company concept by their cousin, Elon Musk, who was the chairman and helped start the company. [3] By 2009, solar panels it had installed were capable of generating 440 megawatts (MW) of power. [4] [5]In 2011, the company launched their expansion to the East Coast with ...

When compared with the national numbers however, SolarCity's costs are firmly above the average, with most home installs falling in the range of \$3-4 per watt. Another thing to consider is that SolarCity use own-branded generic panels and equipment, and the quality is reported to be no more than average.
